

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

ILAN GOLECKI, ET AL

GROUP: 1774

FLUIDIZING OXIDATION PROTECTION
SYSTEMS

EXAMINER: UNKNOWN

FILED: JULY 18, 2003

SERIAL NO.: 10/622,257

CONF. NO.: 3289

DECLARATION UNDER SECTION 305C OF THE
NATIONAL AERONAUTICS AND SPACE ACT OF 1958

RECEIVED
APR 23 2004
LICENSING & REVIEW

Ilan Golecki, an inventor in the above-identified patent application, declares:

That at the time the invention was conceived and reduced to practice he was employed by Honeywell International Inc.;

That he is currently employed by Honeywell International Inc., the current assignee of the entire right, title and interest in the above-identified patent application;

That at the time the invention was made, he was employed as Principal Scientist, by Honeywell International Inc. at its Morristown, NJ research laboratories;

That at the time the invention covered by the above-identified application was conceived, one of his assignments was to develop and evaluate anti-oxidant systems;

That the invention described and claimed in the above-identified patent application was conceived, developed, and tested by him as a result of work that included Contract No. F-33615-99-C-5009 with the United States Air Force, identified by Honeywell International Inc., relating to a heat exchanger program to which he was assigned during the work hours of his employment;

That he used, in part, funds which were furnished by Honeywell International Inc. under the U.S. Air Force Contract and pursuant to the program;

That the invention described and claimed in the above-identified patent application was neither conceived nor reduced to practice in the performance of any work under any contract or subcontract or arrangement entered into with or for the benefit of the National Aeronautics and Space Agency;

That the work resulting in the invention described and claimed in the above-identified application was not financed by any contract, subcontract, or

arrangement entered into with or for the benefit of the National Aeronautics and Space Agency; and

That all statements made herein are of his own knowledge, are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the above-identified application or any patent issued thereon.

Signed at Morristown, New Jersey this 14 day of April, 2004.

LICENSING & REVIEW

Terence B. Walker and Laurie A. Booker, inventors in the above-identified patent application, declare:

That at the time the invention was conceived and reduced to practice they were employed by Honeywell International Inc.;

That they are currently employed by Honeywell International Inc., the current assignee of the entire right, title and interest in the above-identified patent application;

That at the time the invention was made, they were employed as Senior Engineer and Engineering Technician, respectively, by Honeywell International Inc. at its Aircraft Landing Systems business;

That at the time the invention covered by the above-identified application was conceived, one of their assignments was to develop and evaluate anti-oxidant systems;

That the invention described and claimed in the above-identified patent application was conceived, developed, and tested by them as a result of work related to Contract No. F-33615-99-C-5009 with the United States Air Force, for Honeywell International Inc., on a heat exchanger program to which they were assigned during the work hours of their employment;

That they used, in part, funds which were furnished solely by Honeywell International Inc. under the U.S. Air Force Contract and pursuant to the program;

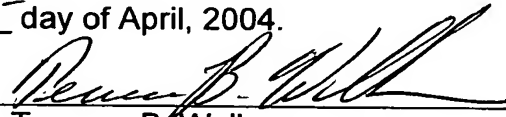

That the invention described and claimed in the above-identified patent application was neither conceived nor reduced to practice in the performance of any work under any contract or subcontract or arrangement entered into with or for the benefit of the National Aeronautics and Space Agency;

That the work resulting in the invention described and claimed in the above-identified application was not financed by any contract, subcontract, or

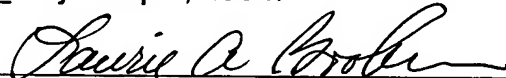

arrangement entered into with or for the benefit of the National Aeronautics and Space Agency; and

That all statements made herein are of their own knowledge, are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the above-identified application or any patent issued thereon.

Signed at South Bend, Indiana this 15th day of April, 2004.
